Culture in Software devp

David Okwii,
Software Devp, Africa's Talking
Chief Monk @Sitemonki
https://davidokwii.com

What's culture?

- Everything else that's not code
- Intersection of your technical skills, people, processes and the product

The Myth of a 10x Engineer

- Stay humble, you are not that smart
- You'll never be really good enough
- Be ready to admit mistakes and learn
- Be ready to accept help
- Be willing to help others

The imposter syndrome

- You tend to either underrate or overrate yourself
- Hold yourself to high standards, but benchmark against yourself
- Finish your projects, build a portfolio
- Quit keeping up with the Joneses

Give back

- You are already standing on the shoulder of giants
- Participate in the community
- Mentor someone
- start a blog/podcast/host event, opensource

Thank you

Questions & Comments are welcome.
